

CALL FOR PAPERS

ICGSR 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGSR 2022 : International Conference on Computational Geophysics and Sedimentary Rocks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Geophysics and Sedimentary Rocks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geology and mineral resources
Sedimentology and coastal process
Structural geology and tectonics
Mineral exploration and mining
Geology and civil engineering
Exploration geophysics
Geological modelling
Paleontology
Geology market
Minerals geophysics
Petroleum geophysics
Environmental geophysics
Exploration geophysics

Computational geophysics
Geophysics in the oilfield
Petroleum geology
Environmental geology
Geology engineering
Radioactive geophysics
Remote sensing and GIS Applications
in earth sciences
Exploration, development and
production of earth resources
Mineral processing, waste
management and recycling
Rock mechanics applied to
seismology
Dynamic tectonics
Earthquake and structural
engineering
