

# CALL FOR PAPERS

**ICIFCST 2022**  
**Oct 21-22, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIFCST 2022 : International Conference on Intelligent Flight Control Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Flight Control Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent flight planning  
Flight path planning  
Intelligent flight control  
Intelligent flight control systems  
Cooperative planning systems  
Unmanned aircraft design  
Air traffic control and management

Simultaneous localization and mapping  
Aircraft onboard intelligence  
Flight test instrumentation  
Emergency flight planning  
Free-flight planning, control and simulation  
Airborne flight planning and information systems  
Agent-based approach to free-flight planning
