

CALL FOR PAPERS

ICNSA 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNSA 2022 : International Conference on Network Systems and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network Systems and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Network Systems and Applications
Architecture, scalability and security of Open API solutions
Technical and social aspects of Open API and open data
Web services - standards and applications
Service delivery platforms - architecture and applications
Telecommunication operators API exposition in Telco 2.0 model
The applications of intelligent techniques in network systems
Mobile applications
Network-based computing systems
Computer forensic and network security
Traffic classification algorithms and techniques
Network traffic engineering

Wireless communications
Control of networks
Sensor Circuits and Sensor Devices
Architectures, Protocols and Algorithms of Sensor Network
Management, Energy and Control of Sensor Network
Data Allocation and Information Processing in Sensor Networks
Resource Allocation, Services, QoS and Fault Tolerance in Sensor Networks
Security and Monitoring of Sensor Networks
Software, Applications and Programming of Sensor Network
Performance, Simulation and Modeling of Sensor Network
Applications of Wireless Sensor Networks
