

CALL FOR PAPERS

ICSPCP 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSPCP 2022 : International Conference on Sustainability in Plant and Crop Protection is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainability in Plant and Crop Protection. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Crop protection
Farming and crop protection
Abiotic damage
Agronomic control methods
Assessment of pest and disease damage
Molecular methods for the detection and assessment of pests and diseases
Biological control
Biorational pesticides
Control of animal pests of world crops
Control of diseases of crop plants caused by microorganisms
Control of weeds and integrated management
Economic and social considerations
Effects of plant growth regulators

Environmental benefits of reduced pesticide use
Environmental effects of pesticides
Epidemiology of pests and diseases in relation to control
Gm crops, and genetic engineering applications
Importance and control of postharvest crop losses
Integrated control
Interrelationships and compatibility among different control strategies
Invasive species as they relate to implications for crop protection
Pesticide application methods
Pest management
Plant bioms: for pest and disease control
Resistance management
Sampling and monitoring schemes for diseases, nematodes, pests and weeds
