

CALL FOR PAPERS

ICTPS 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTPS 2022 : International Conference on Transportation Problems and Solutions is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Transportation Problems and Solutions. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coastal structures and solutions to coastal problems
Substation structures
Transportation problems
Urban designing and transportation
Structural and construction engineering
Road and bridge engineering
Geotechnical engineering
Hydraulic engineering
Coastal engineering
Earthquake engineering
Materials engineering
Engineering management

Surveying computing in civil engineering
Acquisition processing and publishing of traffic information
Traffic guidance and forecast
Urban traffic control and congestion pricing
Vehicle safety and emissions
Modeling and simulation of transportation system
Flood management
Human interactions in civil engineering projects
Stormwater and wastewater management
Sustainable designs of civil engineering projects
Applications of information technology in civil engineering
