

CALL FOR PAPERS

ICCMC 2022
Oct 28-29, 2022
Los Angeles, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMC 2022 : International Conference on Chemical and Molecular Environment of Cell is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical and Molecular Environment of Cell. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cell biology
Structures and functions of the cell
Internal cellular structures
Chemical and molecular environment
Organelles
Processes
Growth and development
Other cellular processes
Techniques used to study cells
Physiological properties
Cell specialization
Origin of multicellularity
Origin of the first cell

Origin of eukaryotic cells
Metabolic processes
Signaling pathways
Life cycle
Interactions with their environment
Microscopic and molecular level
Active transport and passive transport - movement of molecules into and out of cells.
Autophagy
Adhesion
Cell movement
Cell signaling
Division
Dna repair
