

# CALL FOR PAPERS

**ICNEEA 2022**  
**Oct 07-08, 2022**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNEEA 2022 : International Conference on Nanowires for Energy Engineering Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanowires for Energy Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanowires for energy applications  
Nanowires for solar energy conversion  
Nanowires for energy generation  
Nanowires for new electrodes in proton exchange membrane fuel cells  
Semiconductor nanowires for energy applications  
Silicon nanowires for green energy applications

Electrospun semiconductor metal oxide nanowires for energy and sensing applications  
Integration into flexible and functional materials  
Nanowire based bulk heterojunction solar cells  
Semiconductor nanowires for thermoelectric generation  
Energy scavenging: mechanical, thermoelectric  
Nanowire synthesis/growth methods
