

CALL FOR PAPERS

ICCMAPM 2022
Oct 21-22, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMAPM 2022 : International Conference on Computational Movement Analysis and Predictive Modeling is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Movement Analysis and Predictive Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational movement analysis
Analysis and visualization of movement
Big mobility data analytics and predictive modeling
Making movement analysis context-aware, considering the static and dynamic environment
From individuals to collectives:
Modeling and analyzing interactions between individuals
Integrating different sensors and sensing models

From analysis to modeling:
Simulation of movement and mobility
Visualization and visual analytics in support of movement analysis
From patterns to processes:
Bridging the semantic gap
Inferring behaviors and motivations underpinning movement
Geoprivacy issues and geomasking methods for mobility data
