

CALL FOR PAPERS

ICCSFI 2022
Oct 21-22, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSFI 2022 : International Conference on Causes of Structural Failures and Instability is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Causes of Structural Failures and Instability. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil engineering
Structural engineering
Building structure
Building failures
Structural integrity and failure
Notable failures
Types of failure
Structural failure analysis
Structural reinforcement and failure analysis
Prediction methods
Instability
Fracture, deformation, or fatigue
Causes of structural failure

Geometry, design or material choice
Size, shape, or the choice of material
Manufacturing errors
Improper selection of materials
Unpredictable failure
Vandalism, sabotage and natural disasters
Preventing failures in future designs
Catastrophic failure
Nonbuilding structure
Building structures and technology
Structural design
Building design
Structural pattern
