

CALL FOR PAPERS

ICGGD 2022
Oct 21-22, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGGD 2022 : International Conference on Geotechnical and Geosynthetic Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geotechnical and Geosynthetic Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geotechnical design
Geotechnical operations and administration
Geotechnical design objectives for project definition phase
Geotechnical design objectives for project design phase
Geotechnical design objectives for development phase
Geotechnical design, construction and maintenance support
Project geotechnical planning
Field investigation
Engineering properties of soil and rock
Soil and rock classification and logging
Geotechnical design for marine structure foundations

Infiltration facility design
Foundation design for signals, signs, noise barriers, culverts, and buildings
Geosynthetic design
Foundation design
Slope stability analysis
Seismic design
Soil cut design
Ground improvement
Rock cut design
Rockslope analysis and mitigation
