

CALL FOR PAPERS

ICSTC 2022
Oct 21-22, 2022
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTC 2022 : International Conference on Spacecraft Thermal Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Spacecraft Thermal Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Spacecraft thermal control
Spacecraft thermal control systems
and insulation systems
Advanced cooling technologies
Space system thermal analysis and
spacecraft design
Temperature requirements
Conductive heat transfer
Thermal radiation heat transfer

Thermal control surfaces
Thermal control testing
Current technologies
Current and future techniques for
spacecraft thermal control
Passive thermal control system
Active thermal control system
Future of thermal control systems
