

CALL FOR PAPERS

ICGSDEA 2022
Oct 25-26, 2022
Barcelona, Spain

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGSDEA 2022 : International Conference on Global Software Development and Engineering Applications is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Global Software Development and Engineering Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Global software development
Global software engineering and technology
Cloud computing and crowdsourcing
Communication, coordination, and control
Design thinking and global product design
Industrial offshoring and outsourcing experiences
Industry case studies of all topics in this list
Lean and agile development
Managing and working with suppliers and contractors
Methods and processes
Mining software repositories and software analytics

Open source software communities
Security and privacy
Social and human aspects of software development
Social network analysis
Software architecture
Software business model innovation
Software evolution and maintenance
Software project management
Software testing
Strategic issues in distributed development
Tools and infrastructure support
