

# CALL FOR PAPERS

**ICNGEPST 2022**  
**Oct 06-07, 2022**  
**Beijing, China**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNGEPST 2022 : International Conference on Natural Gas Engineering: Production, Storage and Transportation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Natural Gas Engineering: Production, Storage and Transportation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Natural gas processing  
Natural gas production  
Natural gas transportation  
Natural gas exploration, drilling,  
and well completion  
Liquefied natural gas  
Natural gas storage  
Natural gas supply  
Origin and accumulation of natural  
gas  
Natural gas geochemistry  
Gas-reservoir engineering  
Well logging, testing and  
evaluation  
Mathematical modelling

Enhanced gas recovery  
Thermodynamics and phase behavior  
Gas-reservoir modelling and  
simulation  
Natural gas production engineering  
Primary and enhanced production  
from unconventional gas resources  
Coalbed methane, tight gas, shale  
gas, and hydrate production  
Formation evaluation, exploration  
methods, multiphase flow and flow  
assurance issues  
Novel processing techniques  
Raw gas transmission methods  
Gas processing/LNG technologies  
Sales gas transmission and storage
