

# CALL FOR PAPERS

**ICAPSP 2022**  
**Oct 28-29, 2022**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPSP 2022 : International Conference on Advanced Power System Protection is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advanced Power System Protection. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power-system protection  
Protection system in power system  
Protective devices, systems, and technologies  
Intelligent techniques applied to protection systems  
Adaptive relaying  
Communication systems dedicated to protection systems

Advanced signal processing techniques applied to protection systems  
Multi-agent based protection systems  
Wide-area protection systems based on broadband communications and time synchronous systems  
Application of phasor measurement units to protection systems  
Development of unified protocols dedicated to protection systems  
Fault location techniques
