

CALL FOR PAPERS

ICMESA 2022
Oct 28-29, 2022
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMESA 2022 : International Conference on Medical Engineering Systems and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Medical Engineering Systems and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biomedical Electronics
Clinical BioChemistry
Biomechatronics
Biomaterials
Biophysics
Biomechanics of injury and wound healing
Bionics
Biometrics
Cellular, Tissue and Genetic Engineering
Medical Engineering Systems and Applications
Biomedical Intelligence and Clinical Data Analysis
Orthopedic Bioengineering
Computational Models
Mobile Imaging

Robotic Vision
Rehabilitation engineering
Systems Physiology
Bionanotechnology
Bioinformatics of Diseases
Bioinstrumentation
Neural Engineering
Toxicology
Immunology
Social and preventive medicine
Sport and exercise medicine
Injury Prevention and Health Protection
Medical Robotics
