

CALL FOR PAPERS

ICCECAMD 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCECAMD 2022 : International Conference on Computational Electromagnetics, Computer-Aided Methods and Design is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Electromagnetics, Computer-Aided Methods and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational electromagnetics
Computational electromagnetics and applications
Computational electromagnetics and electrodynamics
Integral equation solvers
The discrete dipole approximation
Computer-aided methods
Computer-aided design
Electromagnetic simulators
Field-solving methods

Maxwell's equation-based methods
Optics-based methods
Finite element method
Method of moments
Finite difference time domain
Transmission line matrix
Validation
Light scattering codes
