

CALL FOR PAPERS

ICCPCAM 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCPCAM 2022 : International Conference on Complex Plane and Complex Analysis in Mathematics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Complex Plane and Complex Analysis in Mathematics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Complex plane
Geometric representation
Complex analysis
Complex-valued functions
Notational conventions
Argand diagram
Stereographic projections
Cutting the plane

Multi-valued relationships and
branch points
Restricting the domain of
meromorphic functions
Specifying convergence regions
Use of the complex plane in control
theory
Quadratic spaces
Potential theory in the complex
plane
Second order differential
inequalities in the complex plane
