

CALL FOR PAPERS

ICFCCA 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFCCA 2022 : International Conference on Forensic Chemistry and Chemical Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forensic Chemistry and Chemical Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Forensic chemistry
Ballistic fingerprinting
Forensic toxicology
Forensic data analysis
Forensic arts
Bloodstain pattern analysis
Fingerprint analysis
Capillary electrophoresis in forensic chemistry

Applications of icp-ms in chemical analysis of forensic evidence
Recent advancements in sample preparation and extraction methods in forensic analysis
Laboratory automation in forensics
Case studies of drug profiling
Applications of desi-ms in forensic analysis
Volta metric analysis of "substance of abuse"
Method development and applications of LC-MS/MS in forensic analysis
Applications of scanning electron microscope (SEM) in foot print detection
