

# CALL FOR PAPERS

**ICFSTCM 2022**  
**Oct 21-22, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFSTCM 2022 : International Conference on Food Safety, Toxic Components and Micronutrients is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Food Safety, Toxic Components and Micronutrients. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Food, public health and food policy  
Food supplements and food labels  
Food quality and management  
Nutrition and nutritional management  
Current trends and research in nutrition and food science  
Changes in food components during fermentation  
Food biochemistry and food microbiology  
Genetically modified foods  
Antioxidants and lipid oxidation in foods  
Bioactive constituents, micronutrients, food additives and ingredients  
Analytical methods for food components  
Enzymatic reactions in foods

Functional foods and functionality  
Food contamination and toxic components  
Foodborne infections and diseases  
Food safety and control  
Food technology  
Food processing and packaging technologies  
Food and bioprocess technology  
Agriculture biotechnology  
Food nanotechnology  
Nano-engineered foods  
Industrial applications of food technology  
Tools and techniques in food technology
