

CALL FOR PAPERS

ICGPMSDM 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGPMSDM 2022 : International Conference on Geospatial Predictive Modeling and Spatial Data Mining is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geospatial Predictive Modeling and Spatial Data Mining. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geospatial predictive modeling
Spatial data mining
Predictive models
Deductive method
Inductive method

Spatial data analysis and modeling
Geospatial predictive modelling for
climate mapping
Geospatial environmental data
modelling applications
Geospatial predictive modelling of
the archaeological sites
Predictive modelling and spatial
mapping
