

CALL FOR PAPERS

ICIFCST 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIFCST 2022 : International Conference on Intelligent Flight Control Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intelligent Flight Control Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intelligent flight planning
Flight path planning
Intelligent flight control
Intelligent flight control systems
Cooperative planning systems
Unmanned aircraft design
Air traffic control and management

Simultaneous localization and mapping
Aircraft onboard intelligence
Flight test instrumentation
Emergency flight planning
Free-flight planning, control and simulation
Airborne flight planning and information systems
Agent-based approach to free-flight planning
