

CALL FOR PAPERS

ICMFEM 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMFEM 2022 : International Conference on Metallurgical Fundamentals and Earthquake Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Metallurgical Fundamentals and Earthquake Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Non ferrous metal material
- Iron and steel
- High strength alloys
- Materials processing and handling
- Composites
- Micro/Nano materials
- ceramic
- Optical, Electronic, Magnetic materials
- Carbon based materials
- Metallurgical science
- Metallurgical fundamentals and techniques
- New functional materials
- Building materials

- New energy materials
- Environmental friendly materials
- Earthquake materials and design
- Biomaterials
- Smart and intelligent materials
- Intelligent materials systems
- Polymeric materials
- Thin films
- Mechanical behavior and fracture
- Tool testing and evaluation of materials
- Processing technology for functional materials
- Function test and evaluation technology for material analysis
