

CALL FOR PAPERS

ICRCTIE 2022
Oct 21-22, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRCTIE 2022 : International Conference on Radio Communication Techniques in Information Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Radio Communication Techniques in Information Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Radio communication and information
Radio communication in information systems
Radio communication and data transmission techniques
Advanced radio communication technologies
Radio waves
Transmission characteristics
Characteristics of radio frequency bands
Very low, low, and medium frequencies
Digital cellular radio
Mobile radio channels
Speech coding
Channel coding
Quaternary frequency shift keying

Partial-response modulation
Frequency hopping
Wireless QAM-based multi-media systems
Third-generation systems
Wireless ATM
Digital cellular mobile radio systems
Cordless telecommunications
Principles of multiple access communications
Information systems and application
Intelligent systems
Information engineering
Soft computing, fuzzy systems and ann
