

# CALL FOR PAPERS

**ICTPS 2022**  
**Oct 21-22, 2022**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTPS 2022 : International Conference on Transportation Problems and Solutions is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Transportation Problems and Solutions. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coastal structures and solutions to coastal problems  
Substation structures  
Transportation problems  
Urban designing and transportation  
Structural and construction engineering  
Road and bridge engineering  
Geotechnical engineering  
Hydraulic engineering  
Coastal engineering  
Earthquake engineering  
Materials engineering  
Engineering management

Surveying computing in civil engineering  
Acquisition processing and publishing of traffic information  
Traffic guidance and forecast  
Urban traffic control and congestion pricing  
Vehicle safety and emissions  
Modeling and simulation of transportation system  
Flood management  
Human interactions in civil engineering projects  
Stormwater and wastewater management  
Sustainable designs of civil engineering projects  
Applications of information technology in civil engineering
