

# CALL FOR PAPERS

**ICCMC 2022**  
**Oct 28-29, 2022**  
**Los Angeles, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMC 2022 : International Conference on Chemical and Molecular Environment of Cell is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Chemical and Molecular Environment of Cell. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cell biology  
Structures and functions of the cell  
Internal cellular structures  
Chemical and molecular environment  
Organelles  
Processes  
Growth and development  
Other cellular processes  
Techniques used to study cells  
Physiological properties  
Cell specialization  
Origin of multicellularity  
Origin of the first cell

Origin of eukaryotic cells  
Metabolic processes  
Signaling pathways  
Life cycle  
Interactions with their environment  
Microscopic and molecular level  
Active transport and passive transport - movement of molecules into and out of cells.  
Autophagy  
Adhesion  
Cell movement  
Cell signaling  
Division  
Dna repair
