

# CALL FOR PAPERS

**ICEAES 2022**  
**Oct 28-29, 2022**  
**Los Angeles, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEAES 2022 : International Conference on Effects of Aerobic Exercise on Strength is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Effects of Aerobic Exercise on Strength. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Aerobic exercise  
Benefits of aerobic exercise  
Aerobic capacity  
Aerobic exercise and obesity  
Commercial success  
Varieties of aerobic exercise  
Indoor or outdoor aerobic exercise  
Aerobic exercise intensity  
assessment  
Physiologic responses and long-term  
adaptations to exercise  
Aerobic respiration  
Strength training and aerobic  
exercise  
Cardiovascular and behavioral  
effects of aerobic exercise

Aerobic physical activity action  
plan  
The effects of progressive strength  
training and aerobic exercise  
Effect of aerobic exercise on blood  
pressure  
Cardiovascular responses to  
exercise  
Effects of aerobic exercise on  
anxiety disorders  
Effects of aerobic exercise on  
strength  
Influence of aerobic exercise on  
depression  
Exercise and physical activity for  
older adults  
Effects of aerobic exercise on  
anxiety sensitivity  
Exercise in pregnancy and the  
postpartum period  
Exercise strategies to improve  
aerobic capacity
