

CALL FOR PAPERS

ICPSSCDM 2022
Oct 28-29, 2022
Los Angeles, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPSSCDM 2022 : International Conference on Power System Stabilizers, Controller Design and Methods is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Power System Stabilizers, Controller Design and Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Power system stabilization and stabilizers
Technological advances in power system stabilizers
Control action and controller design
Power system modeling
Placement and tuning methods
Enhance power system stability in power system

Tuning studies
Power system stability
Rotor angle, frequency, and voltage stability
Types of power system stabilizers
System diagrams and simulations
Advantages and disadvantages of power system stabilizers
