

CALL FOR PAPERS

ICANM 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICANM 2022 : International Conference on Advances in Nanostructured Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Nanostructured Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanostructured materials
Nanostructured materials and microstructure
Nanostructured materials for engineering applications
Nanostructured materials for advanced technological applications
Physics of nanostructured materials
Nanostructured materials and nanotechnology
Synthesis of nanostructured materials
Carbon-based nanomaterials
Magnetic properties of nanomaterials
Mechanical properties of nanomaterials

Electrochemical processing of nanostructured materials
Sputtered multilayer nanoscale magnetic films
Electromagnetic properties of multilayer nanoscale films
Nanophotonic materials
Nanobiotechnology and nanotechnology
Nanocomposites
Nanoelectronics, devices and sensors
Nanofunctional materials
Nanotoxicology, nanometrology, and nanomagnetism
