

CALL FOR PAPERS

ICCMMP 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCMMP 2022 : International Conference on Condensed Matter and Materials Physics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Condensed Matter and Materials Physics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Biological Systems & Liquid
Crystals
Computational physics of material
Computer Simulation in Soft Matter
Correlated Electrons
Dielectrics
Electronic Structure & Phonons
Energy Materials
Experimental Techniques & Devices
Functional Phase Transition
Physics
Graphene and carbon physics
Intermetallic Alloys and their
Surfaces: Structure, Properties and
Applications
Liquids and Complex Fluids
Liquids, Glasses & Amorphous
Systems

Local Structures of Functional
Materials
Low temperature physics
Magnetism and spintronics
Magnetism including Spintronics
Materials for energy
Matter under Extreme Conditions
Metamaterials, photonics and
plasmonic
Nanomagnetism/Spintronics
Nano-materials
Nanoscale physics and technology
Nanoscale Physics at Low
Temperatures
Neutron Spectroscopy
Nonlinear Dynamics Complexity and
Synchronization
