

CALL FOR PAPERS

ICDCST 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDCST 2022 : International Conference on Distributed Control Systems and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Distributed Control Systems and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Distributed control systems	Control of networked agent systems
Nonlinear optimization	Distributed optimization of multiagent systems
Large-scale optimization	Distributed energy management systems
Design of communication networks to support distributed control/optimization	Distributed control in smart grids
Computer network	Distributed voltage control
Programmable logic controllers	Distributed control of unmanned underwater vehicles
Commercial distributed control systems	Distributed control of cyberphysical systems
Distributed control of networked agent systems	Distributed security control of complex networks
Distributed cooperative control of multiagent systems	Local control unit
Synchronization in complex networks	Data acquisition unit
Pinning control of large-scale coupling systems	Batch sequencing unit
Collective behaviors in complex networks	Local display
Cooperative control with uncertain/stochastic disturbances	Bulk memory unit
