

CALL FOR PAPERS

ICEGB 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEGB 2022 : International Conference on Experimental Genetics and Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Experimental Genetics and Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Experimental genetics	Chromosome dynamics
Modern genetic analysis	Structural genomics
Clinical and experimental genetics	Epigenetics and methylation
Probability models and statistical methods in genetics	DNA damage and repair
Genetics experiments with bacterial viruses	Gene structure and function
Experimental genetics and genomics	Genome stability and expression
Isolation of phenotypic variants	Clinical genetics
Analysis of progeny of controlled matings	Molecular genetics
Biochemical analysis of cellular processes controlled by specific genes	Genetic instability
Microscopic analysis and analysis of DNA	Cytogenetics
Gene engineering	Epigenetics
Genomics development	Statistical genetics
