

CALL FOR PAPERS

ICMCS 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMCS 2022 : International Conference on Mathematics and Computational Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mathematics and Computational Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced Computing Architectures
and Programming Models
Advanced Numerical Algorithms
Algorithmic Approaches to
Computational Kernels and
Applications
Applications of Computation as a
Scientific Paradigm
Applied Dynamical Systems
Complex Adaptive Systems
Complex Systems: Modeling and
Simulation
Complex Variables and Functions
Computational Algebra and Number
Theory
Computational Discrete Mathematics
Computational Geometry
Computational Graphs and Algebra
Computational Humanities

Computational Neural Science and
Engineering
Computational Science and
Engineering
Fuzzy Logic and Systems
High Performance Modeling and
Simulation
High-Performance Computing in
Science and Engineering
Hybrid Computational Methods
Large Scale Scientific Instruments
Mathematics and Mathematical
Sciences
Numerical Computation
Numerical Functional Analysis
Numerical Linear Algebra
Numerical Optimisation
Parallel and Distributed Computing
