

# CALL FOR PAPERS

**ICSCIT 2022**  
**Oct 04-05, 2022**  
**Tbilisi, Georgia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCIT 2022 : International Conference on Systems, Control and Information Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Systems, Control and Information Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Information and control  
Control and information management  
Control and information  
integration  
Control engineering and information  
systems  
Automation and control engineering  
Industrial control and control  
networks  
Control technologies  
Generalized model predictive  
control

Intelligent control methods  
Simulation of large networks on  
smaller networks  
Representations of graphs  
Function definitions and  
applicative programming  
Systolic trellis automata  
Stability, decidability and  
complexity  
Exponential and probabilistic  
complexity classes
