

CALL FOR PAPERS

ICTE 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTE 2022 : International Conference on Tissue Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Tissue Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Tissue engineering	Scaffolds in tissue engineering
Biomaterials	Stem cell engineering
3D bioprinting	Surface modifications and nanotechnology
Artificial organs and related biomaterials	Assembly methods
Bioceramics	Self-assembly
Biocompatibility	Liquid-based template assembly
Biomaterial interactions	Additive manufacturing
Biometals	Scaffolding
Biopolymers	Tissue culture
Bioreactors	Bioreactors
Dental implants for tooth fixation	Long fiber generation
Implant materials	Bioartificial organs
Organ printing
