

# CALL FOR PAPERS

**ICTEDI 2022**  
**Oct 04-05, 2022**  
**Tbilisi, Georgia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTEDI 2022 : International Conference on Tissue Engineering and Dental Implants is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Tissue Engineering and Dental Implants. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Technologies using the concepts of tissue engineering

Reports on hard and soft tissue engineering and their utility for dental implant therapy

Current strategies used for maxillary reconstruction, including the utilization of autogenous graft, allograft, synthetic materials (alloplast) and autologous nontransfusional hemocomponents, and stem cells experimental use

Biomaterials: biodegradable and bioresorbable materials, as well as scaffold designs

Characterization of new devices and their application in clinical practice, in the tissue engineering field

Digital dentistry, including CAD/CAM and intraoral imaging, computer-aided implant dentistry, digital radiography, occlusion, and TMJ analysis and diagnosis  
Advanced implant dentistry
