

# CALL FOR PAPERS

**ICTMCC 2022**  
**Oct 04-05, 2022**  
**Tbilisi, Georgia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTMCC 2022 : International Conference on Techniques for Monitoring Coastal Change is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Techniques for Monitoring Coastal Change. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coastal zones monitoring  
Regional sea-level change  
Winds, waves, currents and extreme events  
Land-use change and urbanization  
Land-cover change  
Techniques for monitoring coastal change  
Sediment transport  
Coastal topography

Shallow-water bathymetry  
Shallow-water hydrodynamics  
Satellite altimetry  
Satellite multispectral imagery  
Video-monitoring  
Space geodetic techniques for coastal zone monitoring  
Coastal zone monitoring using remote sensing techniques  
Application of remote sensing methods to monitor coastal zones
