

CALL FOR PAPERS

ICTUE 2022
Oct 04-05, 2022
Tbilisi, Georgia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTUE 2022 : International Conference on Tunnel and Underground Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Tunnel and Underground Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Underground engineering
Underground engineering for sustainable urban development
Planning, design, construction and operation of the underground space
Health, safety and sustainable underground
Lifecycle sustainability, costs, and benefits of underground infrastructure development
Innovative underground technology and engineering for sustainable development
History of subsurface development
Design of underground structures
Underground constructions
Project management in underground engineering
Operation system in underground engineering

Disasters and protection in underground engineering
Design of earth support systems
Design of groundwater control systems
Value engineering of underground project designs
Instrumentation of underground facilities
Dispute resolution regarding underground construction
Inspection/evaluation of existing underground facilities
Design of tunnel lining system
Design of large and small underground civil works
Design for emergency repair of tunnels and other underground facilities
