

CALL FOR PAPERS

ICFSGMF 2022
Nov 15-16, 2022
Jeddah, Saudi Arabia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFSGMF 2022 : International Conference on Food Security and Genetically Modified Foods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Food Security and Genetically Modified Foods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced biotechnological and nanoscience developments and applications in food research
Bioactive compounds ingredients and technologies
Consumer attitudes to food and risk assessment.
Food allergies and intolerances
Food function and relationships between diet and disease
Food and health
New developments in food engineering
Rapid techniques for online control
Novel processing and packaging technologies
Quality assurance methods and application of -omics techniques

Risk assessment of both biological and non-biological hazards in food
Food safety, analysis and control
Prevention of microbial and chemical contaminants in food
New paths for targeted food processing
Design of new and re-evaluation of traditional techniques and ingredients
Non-thermal technologies and process combinations
Analytic approaches and mechanistic insights
Food composition, structure design, digestion and ingredient bioavailability
Sensor technology and quality monitoring during processing and storage
Modeling and simulation of food matrix properties and processing technologies
