

# CALL FOR PAPERS

**ICGRSDA 2022**  
**Nov 15-16, 2022**  
**Jeddah, Saudia Arabia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGRSDA 2022 : International Conference on Geodetic Remote Sensing and Data Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geodetic Remote Sensing and Data Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geodetic remote sensing  
Data acquisition techniques  
Remote sensing and geodetic measurements  
Remote sensing measurements  
Geographic information systems  
Applications of remote sensing  
Geodetic  
Acoustic and near-acoustic  
Data processing  
Data processing levels

History  
Remote sensing software  
Geodetic surveying, to include geometrical and physical geodesy  
Datums and coordinate systems  
Space and surface geodetic techniques  
Gravity and precise leveling  
Uncertainty estimation  
Error propagation  
GPS data collection and analysis  
Volcanic slope monitoring
