

CALL FOR PAPERS

ICCESP 2022
Nov 18-19, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCESP 2022 : International Conference on Civil Engineering and Specialist Practice is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Civil Engineering and Specialist Practice. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Civil engineering
- Civil engineering practice
- Specialist practice
- Practical approach
- Management practices
- Practical application of new technologies
- Adapting civil engineering practice
- Civil engineering works
- Civil engineering planning
- Civil engineering contracts
- Civil engineering construction
- Infrastructure projects
- Transport systems and water supply networks

- Consultant of civil engineering works
- Construction management and analysis
- Environmental concerns
- Creating and maintaining structures
- Materials science and statistical analysis
- Functional structures
- Strengthening and rehabilitating structures
- Manufacturing processes
- Structures that surround us: buildings, transport networks, energy and water supplies
- Design, construction and maintenance of the physical and naturally built environment
- Materials science
- Construction and structure
- Water resources
