

# CALL FOR PAPERS

**ICCNE 2022**  
**Nov 18-19, 2022**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCNE 2022 : International Conference on Corneal Neovascularization and Eye Diseases is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Corneal Neovascularization and Eye Diseases. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Anti IL-6 therapy
- Corneal reshaping and transplantation
- Choroidal imaging
- Therapies in fighting blindness
- Translational research for periocular basal cell carcinoma and sebaceous cell carcinoma
- Impact of positron emission tomography in ocular adnexae lymphoma
- Updates in management of thyroid eye disease
- Genetic eye disease
- Advances in ophthalmic drug delivery systems
- Topical combination corticosteroid and anti-infective agents
- Transplantation technologies for retina
- Drugs used in the treatment of allergic conjunctivitis
- Oral and topical nonsteroidal anti-inflammatory agents (NSAIDs)
- Diagnostic dye solutions
- Ocular and systemic side effects of drugs
- IVT injection-sparing approaches
- Extended activity approaches
- Sustained delivery approaches
- Antibody dependent and antibody mediated diseases
- Cell mediated diseases
- Corneal graft reactions
- Fungal endophthalmitis
- Antibiotics in ocular infections
- Uveitis, intraocular inflammation
- Recent developments in immunotherapy
- Ocular refraction and therapeutics
