

CALL FOR PAPERS

ICWATS 2022
Nov 11-12, 2022
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWATS 2022 : International Conference on Web Application Testing and Strategies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Web Application Testing and Strategies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Web application testing	White box strategies
Web application security testing	Black box strategies
Testing the non-functional requirements of a web application	Grey box testing strategies
Testing the functional requirements of a web application	User session based testing
Web application representation models	Tools for web application testing
Unit integration and system testing of a web application	Automated web application testing
Unit testing	Automated testing of web applications
Integration testing	Web application performance testing core activities
System testing	Web application performance tool
Strategies for web application testing	Web security testing
