

CALL FOR PAPERS

ICCCIS 2022
Dec 13-14, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCIS 2022 : International Conference on Computer and Computational Intelligence Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer and Computational Intelligence Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computer Science	
Intelligent and Bio-inspired	
Computing	dynamic systems
Distributed and Parallel Computing	computational finance
Database and Data Mining	data mining
Cluster, Grid and P2P Computing	signal and image processing
Mobile Computing and Wireless	Neural Networks
Communications	Computational neuroscience
Scientific and Engineering	Connectionist theory and cognitive
Computing	science
Embedded and Ubiquitous Computing	Mathematical modeling of neural
Advanced Networking and	systems
Applications	Neurodynamic analysis
Security, Privacy and Trust	Associative memories
Web Services and Internet	Neurodynamic optimization and
Computing	adaptive dynamic programming
Daphics and multimedia	Embedded neural systems
semiconductor technology and	Probabilistic and
electronic circuits and system	information-theoretic methods
design
