

# CALL FOR PAPERS

**ICDMLS 2022**  
**Dec 13-14, 2022**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDMLS 2022 : International Conference on Dynamics of Multi Level Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dynamics of Multi Level Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dynamical systems with multiple  
time scales  
Averaging and singular perturbation  
theory  
Projection methods  
Collective chaos  
Information geometry  
Information-theoretic approaches to  
complex systems  
Workshop topics include

Multi-scale methods  
Hierarchies in dynamical systems  
Physics of information  
Self-organization and level  
identification  
Multi-level networks  
Coarse graining  
Aggregation methods
