

CALL FOR PAPERS

ICEET 2022
Dec 13-14, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEET 2022 : International Conference on Electrical Engineering and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electrical Engineering and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Fundamentals, materials and education	Power market and power system economics
Electrical materials and process	Power system modeling, simulation and analysis
Semiconductor technology	HVDC and facts
High voltage engineering and insulation technology	Electromagnetic transients programs (EMTP)
Electronic materials	Wind, solar and renewable energy
Education and training for electrical engineers	Electronics, information and control systems
Power systems and energy	Communication systems
Power system planning and scheduling	Intelligent systems and approach
Power system protection, operation and control	Information technology application
Transmission and distribution systems and apparatus	Control theory and application
Power system stability	Knowledge management
Power generation and sustainable environment
