

CALL FOR PAPERS

ICRAAMP 2022
Dec 13-14, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAAMP 2022 : International Conference on Recent Advances in Atomic and Molecular Physics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances in Atomic and Molecular Physics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Accelerator based AMO Experiments
Applications of AMO Physics
Astronomical/Atmospheric Processes
Atom and Ion Traps
Atom interferometry and atomic clocks
Atomic and molecular astrophysics
Atomic and molecular collisions
Atomic and molecular processes in plasmas
Atomic and molecular spectroscopy
Atomic tests of fundamental physics
Atoms in optical lattices
Attosecond physics
Bose-Einstein condensates

Cavity QED
Clusters and nanoparticles
Coherent control
Cold atoms and molecules
Degenerate quantum gases
Electron Collisions
Fundamental physics, precision measurements and metrology
High pressure plasma sources
Intense Laser-Matter Interactions
Ion-Atom-Molecule Collisions
Laser produced plasmas
Laser spectroscopy
Low pressure plasma sources
