

# CALL FOR PAPERS

**ICSGDA 2022**  
**Dec 13-14, 2022**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGDA 2022 : International Conference on Synthetic Genome Design and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Synthetic Genome Design and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Genome design  
Genome analysis  
Synthetic genome design  
Genomics and gene editing  
Next-generation sequencing  
Genome sequencing  
Interactome sequencing

Minimal genome as a programmable  
biological chassis  
Genome synthesis and assembly  
Genome editing tools  
Zinc finger nucleases  
Transcription activator-like  
effector nucleases  
RNA-guided CRISPR nucleases
