

# CALL FOR PAPERS

**ICSTTA 2022**  
**Dec 13-14, 2022**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTTA 2022 : International Conference on Soil Treatment Techniques and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Soil Treatment Techniques and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Soil treatment	Reinforced soil structures
Soil reinforcement	Woven geotextiles
Geosynthetics for soil reinforcement	Polymer geogrids of polyethylene
Mechanics of reinforced soil	Polyester and fiberglass geogrids
Soil reinforcement techniques	Steel strips
Benefits of reinforced soil	Reinforced slopes and embankments
Applications of soil reinforcement	Reinforced foundations
Soil retaining structures	Mechanically-stabilized earth
Geosynthetic soil reinforcement testing procedures	Limit equilibrium analysis
Soil reinforcement and geosynthetics	Jewell's method for geogrid reinforcement
Use of coir fibers for sustainable development	Generic method for reinforced soil structures
Soil nailing	Internal stability
Field tests on geosynthetic reinforced unpaved roads	External stability
