

CALL FOR PAPERS

ICCCTA 2022
Dec 09-10, 2022
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCTA 2022 : International Conference on Cognitive Communication Technologies and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cognitive Communication Technologies and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cognitive communication systems and technologies

Cognitive communications

Cognitive radio and dynamic spectrum access

Cognitive and autonomic

Context-aware networks and cognitive cross-layer design

Cognitive network design and optimization through distributed learning and reasoning

Cognitive technologies supporting software-defined radios, systems and networks

Information/communications theory and network science

Cognitive communications and networking

Ontologies, languages, and knowledge representation for communications and networking

Policy/economics and spectrum management techniques for cognitive networks
