

CALL FOR PAPERS

ICEFM 2022
Dec 13-14, 2022
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEFM 2022 : International Conference on Ecology in Freshwater Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecology in Freshwater Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Freshwater ecology	Extinction of freshwater fauna
Freshwater ecosystems	Biodiversity of freshwaters
Hydrology and physiography of groundwater and wetland habitats	Aquatic chemistry and nutrient cycling
Physiography of lakes and reservoirs	Toxic chemicals and other pollutants in aquatic ecosystems
Aquatic organisms	Nutrient use and remineralization
Microbes and plants	Predation and food webs
Plants and animals in freshwater communities	Fish ecology and fisheries
Freshwater plants and nutrients
